Evaluation of Certain Food Additives and Contaminants: Seventy-third Report of the Joint FAO/WHO Expert Committee on Food Additives (WHO Technical Report Series) World Health Organization

This report represents the conclusions of a Joint FAO/WHO Expert Committee convened to evaluate the safety of various flavoring agents, with a view to concluding as to safety concerns and to preparing specifications for identity and purity. The Committee also evaluated the risk posed by two food contaminants, with the aim of deriving tolerable intakes where appropriate and advising on risk management options for the purpose of public health protection.

The first part of the report contains a general discussion of the principles governing the toxicological evaluation of and assessment of dietary exposure to food additives (particularly flavoring agents) and contaminants. A summary follows of the Committee's evaluations of technical, toxicological and dietary exposure data for 12 groups of flavoring agents (alicyclic ketones, secondary alcohols and related esters; alicyclic primary alcohols, aldehydes, acids and related esters; aliphatic acyclic and alicyclic α -diketones and related α -hydroxyketones; aliphatic acyclic and alicyclic terpenoid tertiary alcohols and structurally related substances; aliphatic and aromatic amines and amides; aliphatic lactones; aliphatic primary alcohols, aldehydes, carboxylic acids, acetals and esters containing additional oxygenated functional groups; aliphatic secondary alcohols, ketones and related esters and acetals; aromatic substituted secondary alcohols, ketones and related esters; benzyl derivatives; phenol and phenol derivatives; and simple aliphatic and aromatic sulfides and thiols) and two food contaminants (cadmium and lead).

Specifications for the following food additives were revised: activated carbon, cassia gum, indigotine, steviol glycosides, sucrose esters of fatty acids, sucrose monoesters of lauric, palmitic or stearic acid and titanium dioxide. Specifications for the following flavoring agents were revised: 4-carvomenthol and 5,6,7,8-tetrahydroquinoxaline.

Annexed to the report are tables summarizing the Committee's recommendations for dietary exposures to and toxicological evaluations of the flavoring agents and contaminants considered.

From reader reviews:

Owen Ray:

Exactly why? Because this Evaluation of Certain Food Additives and Contaminants: Seventy-third Report of the Joint FAO/WHO Expert Committee on Food Additives (WHO Technical Report Series) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will surprise you with the secret it inside. Reading this book alongside it was fantastic author who else write the book in such amazing way makes the content within easier to understand, entertaining method but still convey the meaning thoroughly. So , it is good for you for not hesitating having this any more or you going to regret it. This excellent book will give you a lot of benefits than the other book have got such as help improving your talent and your critical thinking way. So , still want to delay having that book? If I ended up you I will go to the reserve store hurriedly.

Daniel Campbell:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try issue that really opposite from that. 1 activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Evaluation of Certain Food Additives and Contaminants: Seventy-third Report of the Joint FAO/WHO Expert Committee on Food Additives (WHO Technical Report Series), it is possible to enjoy both. It is excellent combination right, you still would like to miss it? What kind of hangout type is it? Oh can happen its mind hangout men. What? Still don't have it, oh come on its called reading friends.

Lynnette Jennings:

The book untitled Evaluation of Certain Food Additives and Contaminants: Seventy-third Report of the Joint FAO/WHO Expert Committee on Food Additives (WHO Technical Report Series) contain a lot of information on the idea. The writer explains your girlfriend idea with easy approach. The language is very clear to see all the people, so do not necessarily worry, you can easy to read that. The book was compiled by famous author. The author will take you in the new period of time of literary works. It is possible to read this book because you can read on your smart phone, or product, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open up their official web-site in addition to order it. Have a nice examine.

Gerard Norman:

What is your hobby? Have you heard that question when you got pupils? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person similar to reading or as studying become their hobby. You should know that reading is very

important and book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them are these claims Evaluation of Certain Food Additives and Contaminants: Seventy-third Report of the Joint FAO/WHO Expert Committee on Food Additives (WHO Technical Report Series).
