Oceans 2020: Science, Trends, and the Challenge of Sustainability

Oceans 2020: Science, Trends, and the Challenge of Sustainability

Oceans 2020 presents a comprehensive assessment of the most important science and societal issues that are likely to arise in marine science and ocean management in the next twenty years. Sponsored by the Intergovernmental Oceanographic Commission (IOC), the Scientific Committee on Oceanic Research (SCOR), and the Scientific Committee on Problems of the Environment (SCOPE), the book brings together the world's leading ocean scientists and researchers to analyze the state of marine science and technology, identify key scientific issues for sustainable development, and evaluate the capability of scientists, governments, and private-sector stakeholders to respond to those issues. Topics include: basic ocean sciences pressures on the coastal zone climate change and the ocean fisheries and fishery science in their search for sustainability offshore industries including oil drilling, carbon sequestration, and manganese nodule mining marine information for shipping and defense Also included are chapters on cross-cutting issues including operational oceanography, ocean instrumentation and technology, developing frameworks for cooperation, and capacity building in developing nations. In addition, the book offers an introductory overview and a "Vision to 2020" that outlines a path to rational ocean governance. In each chapter, contributors give a brief but comprehensive overview of the subject and then consider what has been achieved in recent years, define the problems, outline solutions, and set forth recommendations on the needs for and directions of ocean science in support of sustainable development for the next twenty years.

Oceans 2020 suggests what can be done about major marine environmental issues through the better development and application of marine science and technology, focusing on the issues that are most closely related to human and sustainable development. It will help guide countries in developing their marine science and technology strategies and priorities and is an essential source of information for policymakers, government officials, resource managers, scientists, the media, and all those concerned with the current and future health of the oceans.

From reader reviews:

Ila Robinette:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Having book everyone in this world could share their idea. Textbooks can also inspire a lot of people. A great deal of author can inspire their very own reader with their story as well as their experience. Not only the storyplot that share in the publications. But also they write about the knowledge about something that you need example of this. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors on earth always try to improve their talent in writing, they also doing some research before they write to the book. One of them is this Oceans 2020: Science, Trends, and the Challenge of Sustainability.

Thomas Tritt:

Your reading 6th sense will not betray you actually, why because this Oceans 2020: Science, Trends, and the Challenge of Sustainability guide written by well-known writer we are excited for well how to make book which can be understand by anyone who have read the book. Written with good manner for you, dripping every ideas and producing skill only for eliminate your hunger then you still question Oceans 2020: Science, Trends, and the Challenge of Sustainability as good book not simply by the cover but also by the content. This is one guide that can break don't judge book by its cover, so do you still needing yet another sixth sense to pick this!? Oh come on your reading through sixth sense already alerted you so why you have to listening to yet another sixth sense.

Daniel Colon:

In this time globalization it is important to someone to get information. The information will make anyone to understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher this print many kinds of book. The book that recommended to your account is Oceans 2020: Science, Trends, and the Challenge of Sustainability this guide consist a lot of the information from the condition of this world now. This book was represented just how can the world has grown up. The words styles that writer make usage of to explain it is easy to understand. The particular writer made some exploration when he makes this book. That's why this book suited all of you.

Mark Bock:

Many people spending their time period by playing outside together with friends, fun activity having family or just watching TV all day long. You can have new activity to pay your whole day by looking at a book. Ugh, do you consider reading a book will surely hard because you have to take the book everywhere? It fine you can have the e-book, getting everywhere you want in your Touch screen phone. Like Oceans 2020: Science, Trends, and the Challenge of Sustainability which is having the e-book version. So , try out this book? Let's view.
