The Ultimate Guide to Vegetable Gardening for Beginners, 2nd Edition: How to Grow Your Own Healthy Organic Vegetables All Year Round! Lindsey Pylarinos

Want to concentrate on specific vegetables that are easy to grow and are favorites in most cookbooks?

The author would like to stress the importance of growing the right type and mix of veggies. This way you get a better crop and useful veggies that usually go hand in hand with each other.

Don't try to do too much too soon. Don't try to start planting when it's too cold outside. The lowest soil temperature for planting is 40 degrees Fahrenheit. The best soil temperature is around 50 degrees to 60 degrees.

Every successful farmer/gardener has a mentality that considers nature first, before spur-of-the-moment decisions. As an added bonus, planting veggies will turn you into a very observant person.

You know you're a serious farmer/gardener when: you learn to watch the news for a weather forecast; you constantly look at the temperature; your schedule improves because you need to water your plants at this hour every day.
