Half-Linear Differential Equations (North-Holland Mathematics Studies)

Ondrej Dosly, Pavel Rehak

Half-Linear Differential Equations (North-Holland Mathematics Studies) Ondrej Dosly, Pavel Rehak The book presents a systematic and compact treatment of the qualitative theory of half-linear differential equations. It contains the most updated and comprehensive material and represents the first attempt to present the results of the rapidly developing theory of half-linear differential equations in a unified form. The main topics covered by the book are oscillation and asymptotic theory and the theory of boundary value problems associated with half-linear equations, but the book also contains a treatment of related topics like PDE's with p-Laplacian, half-linear difference equations and various more general nonlinear differential equations.

- The first complete treatment of the qualitative theory of half-linear differential equations.
- Comparison of linear and half-linear theory.
- Systematic approach to half-linear oscillation and asymptotic theory.
- Comprehensive bibliography and index.
- Useful as a reference book in the topic.

From reader reviews:

Arturo Hasan:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Half-Linear Differential Equations (North-Holland Mathematics Studies). Try to the actual book Half-Linear Differential Equations (North-Holland Mathematics Studies) as your buddy. It means that it can for being your friend when you experience alone and beside those of course make you smarter than previously. Yeah, it is very fortuned in your case. The book makes you much more confidence because you can know everything by the book. So , we should make new experience as well as knowledge with this book.

Joshua Stamper:

Here thing why that Half-Linear Differential Equations (North-Holland Mathematics Studies) are different and trusted to be yours. First of all reading through a book is good however it depends in the content from it which is the content is as yummy as food or not. Half-Linear Differential Equations (North-Holland Mathematics Studies) giving you information deeper and different ways, you can find any publication out there but there is no reserve that similar with Half-Linear Differential Equations (North-Holland Mathematics Studies). It gives you thrill looking at journey, its open up your own eyes about the thing which happened in the world which is might be can be happened around you. It is easy to bring everywhere like in park, café, or even in your approach home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Half-Linear Differential Equations (North-Holland Mathematics Studies) in e-book can be your option.

Mona Savoy:

Your reading sixth sense will not betray you actually, why because this Half-Linear Differential Equations (North-Holland Mathematics Studies) reserve written by well-known writer who knows well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your current hunger then you still question Half-Linear Differential Equations (North-Holland Mathematics Studies) as good book not only by the cover but also with the content. This is one reserve that can break don't evaluate book by its deal with, so do you still needing another sixth sense to pick this specific!? Oh come on your looking at sixth sense already said so why you have to listening to another sixth sense.

Robert Hicks:

As a pupil exactly feel bored for you to reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just little students that has reading's soul or real their interest. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Half-Linear Differential Equations (North-Holland Mathematics Studies) can make you experience more interested to read.
