Cable reels, window frames, washing machines, diapers, crates, carpet tiles, double glazing panels or old buses--you could recycle, discard or even burn all of these things. The other option is to put them to good use: 'superuse.' This is happening everywhere, albeit on a modest scale. Architects apply these materials in their designs. *Superuse* is a practical and inspiring book about constructing new buildings with surplus materials. It was initiated by Recyclicity, a Rotterdam foundation dedicated to such possibilities. Copiously illustrated with examples from the Netherlands and elsewhere, *Superuse* presents ideas for tools and methods for architects and superuse scouts such as the 'harvest map' of everything reusable within a given distance of a building site. *Superuse* renders the superfluous superfluous.
