The Book of Nature: A Sourcebook of Spiritual Perspectives on Nature and the Environment (The Education Project series) Camille Helminski

This anthology of spiritual treatments of nature and the environment presents an uplifting and universal approach to appreciating the natural order from a Muslim perspective. Each chapter is introduced with a passage from the Qur'an and followed by pieces that highlight the human role in maintaining balance in the world. Selections range from poems to short essays and cover topics such as unity, interdependence, communication, the four elements, diversity, and wonder. Including contributions from Muhammad Asad, Alain de Botton, Thomas Berry, Guy Eaton, Seyyid Hossein Nasr, and Vanda Shiva, these reminders of the power of the Divine Order allow for a deeper appreciation of the interdependence of life and nature.
