This book is based on a national literature search focusing on the best practices of cities, of all sizes and geographic locations, intended to maintain public services while holding down taxes. Many public officials have great ideas, but tend to work in a vacuum, so they don't know what other cities are doing. This volume codifies knowledge in this new field for the first time. Every case study included in this book has the city's website listed. This reference work makes it easy for professionals seeking additional information on any and all budget reduction methods that seem to work somewhere.
