Community Design: A Team Approach to Dynamic Community Systems (Cities and Planning) W . Arthur Mehrhoff

Community design has grown in importance in the public policy agenda over the past decade. This book focuses on the author's experience and work in Minnesota where a design team of architects, planners, and economic and community development practitioners provided planning and design assistance to local communities. The book explores the advantages of a systems approach to community design and uses the work of the Minnesota team to consider the issues involved in the implementation of successful community design.
