*Implosion* is a focused study of the history and uses of high-reliability, solid-state electronics, military standards, and space systems that support our national security and defense. This book is unique in combining the interdependent evolution of and interrelationships among military standards, solid-state electronics, and very high-reliability space systems.

Starting with a brief description of the physics that enabled the development of the first transistor, *Implosion* covers the need for standardizing military electronics, which began during World War II and continues today. The book shows how these twin topics affected, and largely enabled, the highest reliability and most technologically capable robotic systems ever conceived.

This riveting history helps readers:

- Realize the complex interdependence of solid-state electronics and practical implementations in the national security and defense space programs
- Understand the evolution of military standards for piece parts, quality, and reliability as they affected these programs
- Gain insight into the attempted reforms of federal systems acquisition of security- and defense-related space systems in the latter half of the twentieth century
- Appreciate the complexity of science and technology public policy decisions in the context of political, organizational, and economic realities

Written in clear, jargon-free language, but with plenty of technical detail, *Implosion* is a must-read for aerospace and aviation engineers, manufacturers, and enthusiasts; technology students and historians; and anyone interested in the history of technology, military technology, and the space program.

### **From reader reviews:**

#### **Mary Bunnell:**

Have you spare time for any day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent all their spare time to take a go walking, shopping, or went to often the Mall. How about open or read a book called Implosion: Lessons from National Security, High Reliability Spacecraft, Electronics, and the Forces Which Changed Them? Maybe it is to become best activity for you. You realize beside you can spend your time using your favorite's book, you can more intelligent than before. Do you agree with its opinion or you have additional opinion?

#### **Kelly Brooks:**

As people who live in often the modest era should be upgrade about what going on or data even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe may update themselves by examining books. It is a good choice in your case but the problems coming to an individual is you don't know which you should start with. This Implosion: Lessons from National Security, High Reliability Spacecraft, Electronics, and the Forces Which Changed Them is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and need in this era.

#### **Irma Chavez:**

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a knowledge or any news even a concern. What people must be consider whenever those information which is inside the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you have the unstable resource then you get it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Implosion: Lessons from National Security, High Reliability Spacecraft, Electronics, and the Forces Which Changed Them as the daily resource information.

#### **Patricia Ramirez:**

People live in this new day of lifestyle always try and and must have the spare time or they will get large amount of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely indeed. People is human not just a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to you of course your answer will probably unlimited right. Then do you try this one, reading books. It can be your alternative inside spending your spare time, the actual book you have read is definitely Implosion: Lessons from National Security, High Reliability Spacecraft, Electronics, and the Forces Which Changed Them.
