Governing Climate Change (Global Institutions) Harriet Bulkeley, Peter Newell

Governing Climate Change, Second Edition, provides a short and accessible introduction to how climate change is governed by an increasingly diverse range of actors, from civil society and market actors to multilateral development banks, donors, and cities.

This updated edition also includes:

- up-to-date coverage of the negotiations post-Copenhagen (Cancun, Durban, and towards Paris) and some of the shifts in the inter-governmental politics;
- a deeper discussion of the roles of actors that have come to prominence in the climate negotiations;
- an overview of the key funding mechanisms such as the Green Climate Fund, Adaptation Fund, the High-Level Advisory Group on Climate Change Finance, and REDD (Reducing Emissions from Deforestation and forest Degradation);
- a direct assessment of what the proliferation of TCCG (Transnational Climate Change Governance) adds up to in terms of legitimacy, effectiveness etc., drawing on all the recent research in this area;
- an analysis of renewable energy in the UK (in the light of recent controversies around the siting of wind turbines and fracking projects).

Providing an interdisciplinary perspective drawing on geography, politics, international relations, and development studies, this book is essential reading for students and scholars concerned not only with the climate governance but with the future of the environment in general.
