Color Atlas of Nerve Biopsy Pathology

Shin J. Oh M.D., Shin J.

process the nerve by frozen sections, by paraffin sections, and by semi-thin sections

The book delineates the general pathological features of peripheral nerve disorders and the diagnostic capability and limitations of the nerve biopsy. It details the typical pathological features of each disease by presenting color photographs and example cases that provide a brief clinical history and pertinent electrophysiological and other laboratory data. The exhaustively illustrated color format provides you with immediate information in reaching a definitive diagnosis.

Unlike other books on this subject, this one contains frozen section materials, case histories, teased nerve illustrations, and newly described neuropathies. The author brings twenty-five years of experience in the lab and teaching to the development of this atlas. In the lab or in the classroom, on the front lines of tissue diagnosis, Color Atlas of Nerve Biopsy Pathology provides you with the information you need clearly, concisely, and conveniently.
