## **Periodate Oxidation of Diol and Other Functional Groups: Analytical and Structural Applications (Monographs in organic functional group analysis)** Glenn Dryhurst

Periodate Oxidation of Diol and Other Functional Groups: Analytical and Structural Applications deals with the chemistry of organic periodate oxidations with special reference to the study of carbohydrates, along with their analytical and structural applications. This book explores the mechanistic aspects of the periodate reaction; its historical development; the nature of the so-called anomalous reactions; and some of the synthetic uses of periodate oxidation.

This book is comprised of seven chapters and opens with a historical background on periodate oxidation, followed by a discussion on the preparation and properties of periodates. The reader is then introduced to the mechanism of periodate oxidation, with particular reference to 1,2-diols and 1,2-hydroxycarbonyl compounds as well as 1,2-diketones, 1,2-aminoalcohols, and active methylene groups. The remaining chapters consider the structure of carbohydrates and related materials; anomalous periodate oxidations; the analytical aspects and applications of periodate oxidation; and a number of tested and generally well-tried analytical procedures such as the Fleury-Lange method, Malaprade method, ion exchange, and spectrophotometric and polarographic techniques.

This monograph will be a useful resource for organic chemists and advanced undergraduate students of chemistry.

**From reader reviews:**

**Shawn Macdonald:**

This book untitled Periodate Oxidation of Diol and Other Functional Groups: Analytical and Structural Applications (Monographs in organic functional group analysis) to be one of several books that will best seller in this year, this is because when you read this publication you can get a lot of benefit on it. You will easily to buy that book in the book store or you can order it through online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason for you to past this guide from your list.

**Edward Brown:**

Reading a guide can be one of a lot of action that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a book will give you a lot of new info. When you read a book you will get new information simply because book is one of a number of ways to share the information or maybe their idea. Second, looking at a book will make an individual more imaginative. When you examining a book especially fiction book the author will bring you to imagine the story how the figures do it anything. Third, it is possible to share your knowledge to other individuals. When you read this Periodate Oxidation of Diol and Other Functional Groups: Analytical and Structural Applications (Monographs in organic functional group analysis), you can tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a publication.

**Ralph Humphries:**

People live in this new moment of lifestyle always make an effort to and must have the time or they will get lot of stress from both way of life and work. So , if we ask do people have extra time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity have you got when the spare time coming to an individual of course your answer will unlimited right. Then do you try this one, reading publications. It can be your alternative in spending your spare time, typically the book you have read is usually Periodate Oxidation of Diol and Other Functional Groups: Analytical and Structural Applications (Monographs in organic functional group analysis).

**Ricardo Hayward:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that question was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person such as reading or as reading through become their hobby. You should know that reading is very important and book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. Many kinds of books that can you go onto be your object. One of them is actually Periodate Oxidation

of Diol and Other Functional Groups: Analytical and Structural Applications (Monographs in organic functional group analysis).
