National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries Arnold and Mabel Beckman Center of the National Academies, Irvine, California, November 9-11, 2006 Conference, The National Academies

The 2006 conference, “Smart Prosthetics: Exploring Assistive Devices for the Body and Mind,” attracted scientists, engineers and medical researchers to participate in a series of task groups to develop research plans to address various challenges within the prosthetics field. Eleven conference task groups gave the participants eight hours to develop new research approaches to various challenges, including: build a smart prosthesis that will grow with a child; develop a smart prosthetic that can learn better and/or faster; refine technologies to create active orthotic devices; and describe a framework for replacing damaged cortical tissue and fostering circuit integration to restore neurological function. Representatives from public and private funding organizations, government, industry, and the science media also participated in the task groups. This book provides a summary of the conference task groups. For more information about the conference, visit the Smart Prosthetics conference site.

The National Academies Keck Futures Initiative was launched in 2003 to stimulate new modes of scientific inquiry and break down the conceptual and institutional barriers to interdisciplinary research. The National Academies and the W.M. Keck Foundation believe considerable scientific progress and social benefit will be achieved by providing a counterbalance to the tendency to isolate research within academic fields. The Futures Initiative is designed to enable researchers from different disciplines to focus on new questions upon which they can base entirely new research, and to encourage better communication between scientists as well as between the scientific community and the public. Funded by a \$40 million grant from the W.M. Keck Foundation, the National Academies Keck Futures Initiative is a 15-year effort to catalyze interdisciplinary inquiry and to enhance communication among researchers, funding agencies, universities, and the general public with the object of stimulating interdisciplinary research at the most exciting frontiers. The Futures Initiative builds on three pillars of vital and sustained research: interdisciplinary encounters that counterbalance specialization and isolation; the identification and exploration of new research topics; and communication that bridges languages, cultures, habits of thought, and institutions. Toward these goals, the National Academies Keck Futures Initiative incorporates three core activities each year: Futures conferences, Futures grants, and National Academies Communication Awards. For more information about the Initiative, visit www.keckfutures.org.

From reader reviews:

Robert Riggio:

This National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries book is not really ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is information inside this guide incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This kind of National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries without we understand teach the one who reading through it become critical in contemplating and analyzing. Don't end up being worry National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries can bring once you are and not make your bag space or bookshelves' turn into full because you can have it with your lovely laptop even cell phone. This National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries having excellent arrangement in word and also layout, so you will not experience uninterested in reading.

Eddie Nelson:

The e-book with title National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries includes a lot of information that you can discover it. You can get a lot of profit after read this book. This book exist new know-how the information that exist in this guide represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This kind of book will bring you inside new era of the internationalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.

Lyman Johnson:

Would you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you just dont know the inside because don't judge book by its cover may doesn't work at this point is difficult job because you are scared that the inside maybe not as fantastic as in the outside search likes. Maybe you answer could be National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries why because the fantastic cover that make you consider concerning the content will not disappoint you. The inside or content is actually fantastic as the outside or even cover. Your reading sixth sense will directly direct you to pick up this book.

Robert Delaney:

As we know that book is significant thing to add our know-how for everything. By a book we can know

everything we really wish for. A book is a group of written, printed, illustrated as well as blank sheet. Every year ended up being exactly added. This reserve National Academies Keck Futures Initiative: Smart Prosthetics: Exploring Assistive Devices for the Body and Mind: Task Group Summaries was filled with regards to science. Spend your free time to add your knowledge about your scientific research competence. Some people has various feel when they reading a new book. If you know how big advantage of a book, you can feel enjoy to read a publication. In the modern era like right now, many ways to get book that you just wanted.
