The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science) Eckart Altenmuller, Sabine Schmidt, Elke Zimmermann

Why do we think that we can understand animal voices - such as the aggressive barking of a pet dog, and the longing meows of the family cat? Why do we think of deep voices as dominant and high voices as submissive. Are there universal principles governing our own communication system? Can we even see how close animals are related to us by constructing an evolutionary tree based on similarities and dissimilarities in acoustic signaling?

Research on the role of emotions in acoustic communication and its evolution has often been neglected, despite its obvious role in our daily life. When we infect others with our laugh, soothe a crying baby with a lullaby, or get goose bumps listening to classical music, we are barely aware of the complex processes upon which this behavior is based. It is not facial expressions or body language that are affecting us, but sound. They are present in music and speech as "emotional prosody" and allow us to communicate not only verbally but also emotionally.

This groundbreaking book presents a thorough exploration into how acoustically conveyed emotions are generated and processed in both animals and man. It is the first volume to bridge the gap between research in the acoustic communication of emotions in humans with those in animals, using a comparative approach. With the communication of emotions being an important research topic for a range of scientific fields, this book is valuable for those in the fields of animal behaviour, anthropology, evolutionary biology, human psychology, linguistics, musicology, and neurology.

From reader reviews:

Michael Colburn:

Reading a e-book can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new details. When you read a e-book you will get new information mainly because book is one of numerous ways to share the information or even their idea. Second, examining a book will make a person more imaginative. When you studying a book especially fiction book the author will bring someone to imagine the story how the characters do it anything. Third, you may share your knowledge to other individuals. When you read this The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science), you are able to tells your family, friends along with soon about yours e-book. Your knowledge can inspire average, make them reading a reserve.

Jesica Demarco:

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you may have done when you have spare time, and then why you don't try factor that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition details. Even you love The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science), you are able to enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh can occur its mind hangout men. What? Still don't understand it, oh come on its known as reading friends.

Matthew Brown:

Your reading sixth sense will not betray you actually, why because this The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science) guide written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written throughout good manner for you, leaking every ideas and creating skill only for eliminate your own personal hunger then you still skepticism The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science) as good book not simply by the cover but also from the content. This is one e-book that can break don't judge book by its deal with, so do you still needing another sixth sense to pick this specific!?! Oh come on your reading sixth sense already alerted you so why you have to listening to another sixth sense.

Harry Baxter:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's internal or real their pastime. They just do what the instructor want, like asked to go to the library. They go to right now

there but nothing reading significantly. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this The Evolution of Emotional Communication: From Sounds in Nonhuman Mammals to Speech and Music in Man (Series in Affective Science) can make you really feel more interested to read.
