Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison

David Sankoff, Joseph Kruskal

Time Warps, String Edits and Macromolecules is a young classic in computational science. The computational perspective is that of sequence processing, in particular the problem of recognizing related sequences. The book is the first, and still best compilation of papers explaining how to measure distance between sequences, and how to compute that measure effectively. This is called string distance, Levenshtein distance, or edit distance. The book contains lucid explanations of the basic techniques; well-annotated examples of applications; mathematical analysis of its computational (algorithmic) complexity; and extensive discussion of the variants needed for weighted measures, timed sequences (songs), applications to continuous data, comparison of multiple sequences and extensions to tree-structures. This theory finds applications in molecular biology, speech recognition, analysis of bird song and error correcting in computer software.

From reader reviews:

Hazel Polk:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim or maybe goal; it means that guide has different type. Some people really feel enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby is definitely reading a book. How about the person who don't like examining a book? Sometime, man or woman feel need book after they found difficult problem or exercise. Well, probably you should have this Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison.

Traci Daniels:

In this 21st millennium, people become competitive in every single way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that often many people have underestimated that for a while is reading. That's why, by reading a reserve your ability to survive boost then having chance to stand up than other is high. In your case who want to start reading any book, we give you this kind of Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison book as starter and daily reading guide. Why, because this book is usually more than just a book.

James Fitzgibbons:

Now a day folks who Living in the era everywhere everything reachable by talk with the internet and the resources within it can be true or not involve people to be aware of each info they get. How people have to be smart in having any information nowadays? Of course the solution is reading a book. Looking at a book can help men and women out of this uncertainty Information specifically this Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison book because this book offers you rich details and knowledge. Of course the information in this book hundred pct guarantees there is no doubt in it you may already know.

Billy Shaner:

Many people spending their time by playing outside along with friends, fun activity together with family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, ya think reading a book can actually hard because you have to accept the book everywhere? It alright you can have the e-book, having everywhere you want in your Touch screen phone. Like Time Warps, String Edits, and Macromolecules: The Theory and Practice of Sequence Comparison which is getting the e-book version. So , try out this book? Let's see.
