Newcomers to wireless technologies will find practical information along with an abundance of examples. Implementation details are discussed only to the extent that readers can identify what type of wireless network may be appropriate for their needs.

Wireless Networks First-Step, written by Jim Geier, begins with a basic introduction to wireless networks and an explanation of radio wave communications. It then reviews different types of wireless networks including WPANs (wireless personal area networks), WLANs (wireless local area networks), wireless MANs (metropolitan area networks), and WWANs (wireless wide area networks). The final section covers security threats to wireless networks, and solutions to combat these threats.
