Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports)

Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports)

This volume aims to document the most important worldwide accomplishments in converging knowledge and technology, including converging platforms, methods of convergence, societal implications, and governance in the last ten years. Convergence in knowledge, technology, and society is the accelerating, transformative interaction among seemingly distinct scientific disciplines, technologies, and communities to achieve mutual compatibility, synergism, and integration, and through this process to create added value for societal benefit. It is a movement that is recognized by scientists and thought leaders around the world as having the potential to provide far-reaching solutions to many of today's complex knowledge, technology, and human development challenges. Four essential and interdependent convergence platforms of human activity are defined in the first part of this report: nanotechnology-biotechnology-information technology and cognitive science ("NBIC") foundational tools; Earth-scale environmental systems; human-scale activities; and convergence methods for societal-scale activities. The report then presents the main implications of convergence for human physical potential, cognition and communication, productivity and societal outcomes, education and physical infrastructure, sustainability, and innovative and responsible governance. As a whole, the report presents a new model for convergence. To effectively take advantage of this potential, a proactive governance approach is suggested. The study identifies an international opportunity to develop and apply convergence for technological, economic, environmental, and societal benefits. The panel also suggests an opportunity in the United States for implementing a program aimed at focusing disparate R and D energies into a coherent activity - a "Societal Convergence Initiative". This study received input from leading academic, industry, government, and NGO experts from the United States, Latin America, Europe, Asia, and Australia.

From reader reviews:

Linda Amos:

Book will be written, printed, or illustrated for everything. You can recognize everything you want by a reserve. Book has a different type. As you may know that book is important thing to bring us around the world. Beside that you can your reading proficiency was fluently. A reserve Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) will make you to always be smarter. You can feel a lot more confidence if you can know about everything. But some of you think in which open or reading the book make you bored. It is not make you fun. Why they might be thought like that? Have you trying to find best book or ideal book with you?

Saul Robinson:

As people who live in the modest era should be up-date about what going on or data even knowledge to make these keep up with the era that is always change and advance. Some of you maybe will certainly update themselves by studying books. It is a good choice for yourself but the problems coming to a person is you don't know what kind you should start with. This Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and want in this era.

Sandra Hughes:

The book untitled Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports) contain a lot of information on this. The writer explains your ex idea with easy method. The language is very easy to understand all the people, so do not worry, you can easy to read the item. The book was written by famous author. The author will bring you in the new age of literary works. It is easy to read this book because you can continue reading your smart phone, or program, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and order it. Have a nice examine.

Stuart Rosado:

A lot of reserve has printed but it is unique. You can get it by web on social media. You can choose the very best book for you, science, comedian, novel, or whatever simply by searching from it. It is known as of book Convergence of Knowledge, Technology and Society: Beyond Convergence of Nano-Bio-Info-Cognitive Technologies (Science Policy Reports). You can add your knowledge by it. Without leaving the printed book, it may add your knowledge and make a person happier to read. It is most significant that, you must aware about book. It can bring you from one location to other place.
