## **Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) Argimiro Arratia**

The book covers a wide range of topics, yet essential, in Computational Finance (CF), understood as a mix of Finance, Computational Statistics, and Mathematics of Finance. In that regard it is unique in its kind, for it touches upon the basic principles of all three main components of CF, with hands-on examples for programming models in R. Thus, the first chapter gives an introduction to the Principles of Corporate Finance: the markets of stock and options, valuation and economic theory, framed within Computation and Information Theory (e.g. the famous Efficient Market Hypothesis is stated in terms of computational complexity, a new perspective). Chapters 2 and 3 give the necessary tools of Statistics for analyzing financial time series, it also goes in depth into the concepts of correlation, causality and clustering. Chapters 4 and 5 review the most important discrete and continuous models for financial time series. Each model is provided with an example program in R. Chapter 6 covers the essentials of Technical Analysis (TA) and Fundamental Analysis. This chapter is suitable for people outside academics and into the world of financial investments, as a primer in the methods of charting and analysis of value for stocks, as it is done in the financial industry. Moreover, a mathematical foundation to the seemingly ad-hoc methods of TA is given, and this is new in a presentation of TA. Chapter 7 reviews the most important heuristics for optimization: simulated annealing, genetic programming, and ant colonies (swarm intelligence) which is material to feed the computer savvy readers. Chapter 8 gives the basic principles of portfolio management, through the mean-variance model, and optimization under different constraints which is a topic of current research in computation, due to its complexity. One important aspect of this chapter is that it teaches how to use the powerful tools for portfolio analysis from the RMetrics R-package. Chapter 9 is a natural continuation of chapter 8 into the new area of research of online portfolio selection. The basic model of the universal portfolio of Cover and approximate methods to compute are also described.

### **From reader reviews:**

#### **William Martel:**

Within other case, little men and women like to read book Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering). You can choose the best book if you like reading a book. Provided that we know about how is important any book Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering). You can add know-how and of course you can around the world by the book. Absolutely right, because from book you can learn everything! From your country right up until foreign or abroad you will find yourself known. About simple issue until wonderful thing you could know that. In this era, we can open a book or even searching by internet unit. It is called e-book. You may use it when you feel bored to go to the library. Let's learn.

#### **Sandra Phillips:**

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important for us. The book Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) was making you to know about other expertise and of course you can take more information. It is rather advantages for you. The book Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) is not only giving you far more new information but also to get your friend when you truly feel bored. You can spend your own personal spend time to read your guide. Try to make relationship with all the book Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering). You never experience lose out for everything in case you read some books.

#### **Julia Sullivan:**

This Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) is great reserve for you because the content and that is full of information for you who always deal with world and get to make decision every minute. This specific book reveal it data accurately using great organize word or we can declare no rambling sentences inside it. So if you are read the item hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but difficult core information with attractive delivering sentences. Having Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) in your hand like keeping the world in your arm, info in it is not ridiculous just one. We can say that no publication that offer you world throughout ten or fifteen moment right but this publication already do that. So , this is certainly good reading book. Hi Mr. and Mrs. hectic do you still doubt which?

**Alice Myers:**

Reading a book make you to get more knowledge from it. You can take knowledge and information from a book. Book is created or printed or highlighted from each source in which filled update of news. On this modern era like right now, many ways to get information are available for you. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just in search of the Computational Finance: An Introductory Course with R (Atlantis Studies in Computational Finance and Financial Engineering) when you essential it?
