Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution

Raymond C. Valentine, David L. Valentine

Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution Raymond C. Valentine, David L. Valentine

More than 7 billion people inhabit the earth and all of them are subject to aging. This book is aimed at persons interested in a molecular explanation of how our cells age. **Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution** is built on the proposition that we age as our mitochondria age. It suggests a revised version of Harman's famous hypothesis featuring mitochondrial oxidative and energy stresses as the root causes of aging.

Human cells are protected from the ravages of aging by a battery of defensive systems including some novel mechanisms against membrane oxidation introduced in this book. This concept is consistent with recent discoveries showing that mitochondria-targeted antioxidants prevent Huntington's disease, Parkinson's disease, and traumatic brain disease in animal models of neurodegeneration.

This book explores a unified theory of aging based on bioenergetics. It covers a variety of topics including an introduction to the science of human aging, the Darwinian selection of membranes enabling longevity, a revised mitochondrial membrane hypothesis of aging, and various mechanisms that protect human mitochondrial membranes, thereby enabling longevity.

From reader reviews:

Bethany Eng:

Why don't make it to become your habit? Right now, try to prepare your time to do the important act, like looking for your favorite guide and reading a publication. Beside you can solve your short lived problem; you can add your knowledge by the guide entitled Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution. Try to make the book Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution as your close friend. It means that it can to get your friend when you really feel alone and beside that of course make you smarter than previously. Yeah, it is very fortunated to suit your needs. The book makes you much more confidence because you can know anything by the book. So , we need to make new experience and also knowledge with this book.

Patricia Bush:

Are you kind of active person, only have 10 as well as 15 minute in your moment to upgrading your mind ability or thinking skill perhaps analytical thinking? Then you are having problem with the book compared to can satisfy your small amount of time to read it because this time you only find guide that need more time to be read. Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution can be your answer mainly because it can be read by an individual who have those short time problems.

Marjorie Calhoun:

That publication can make you to feel relax. This specific book Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution was colourful and of course has pictures on the website. As we know that book Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and believe you are the character on there. Therefore not at all of book are usually make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading that will.

Mary Curtis:

Many people said that they feel weary when they reading a publication. They are directly felt the item when they get a half parts of the book. You can choose the actual book Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution to make your own reading is interesting. Your own personal skill of reading expertise is developing when you just like reading. Try to choose simple book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be initially opinion for you to like to open up a book and study it. Beside that the publication Human Longevity: Omega-3 Fatty Acids, Bioenergetics, Molecular Biology, and Evolution can to be your friend when you're feel alone and confuse in what must you're doing of this time.
